# PUBLIC HEALTH PESTICIDES

## ADEER

## BENEFITS

- Rapid knockdown effect.
- Highly effective against flies, mosquitoes and cockroaches.
- Good persistence on treated surfaces.
- Suitable for homes, restaurants and warehouses.

## ACTIVE INGREDIENT

**Beta-cyfluthrin 12.5% SC**

Chemical group: Pyrethroids

## DESCRIPTION

Liquid pyrethroid suspension concentrate for public health pests, including houseflies and mosquitoes. Provides rapid knockdown and suitable residual activity on treated surfaces.

## APPLICATION RATES

| Target pest | Dilution rate | Application rate |
|---|---|---|
| Houseflies, mosquitoes and cockroaches | 250 mL product/L water | 1.5 mL spray solution/$m^3$ |

## APPLICATION METHOD

Apply with a medium-pressure manual or electric sprayer.
