PUBLIC HEALTH PESTICIDES

AIZO

BENEFITS

- Strong efficacy against mosquito larvae.
- Extended activity in stagnant water.
- Widely used in public health programs.
- Liquid formulation is easy to dilute and apply.

ACTIVE INGREDIENT

Temephos 50% EC

Chemical group: Organophosphates

DESCRIPTION

Emulsifiable concentrate public health insecticide for mosquito larvae in water collection sites. Reduces larval populations and prevents development into adult mosquitoes.

APPLICATION RATES

Target pest	Dilution rate	Application rate
Mosquito larvae	500 mL product / 1,000 L water	500 mL spray solution/10 m^2

APPLICATION METHOD

Dilute with water and spray directly onto stagnant water collection sites likely to contain mosquito larvae.
