PUBLIC HEALTH PESTICIDES

CLEAN AREA

BENEFITS

- Strong efficacy against termites.
- Residual activity in soil for up to 24 weeks.
- Contact and ingestion activity improves control.
- Protects buildings and structures from termite damage.

ACTIVE INGREDIENT

Imidacloprid 30.5% SC

Chemical group: Neonicotinoids

DESCRIPTION

Suspension concentrate public health insecticide for termites in soil and buildings. Acts by contact and ingestion for effective colony control.

APPLICATION RATES

Target pest	Dilution rate	Application rate
Termites	21 mL product / 4-10 mL water*	200 mL spray solution/m² for coating, or soak for 24 hours in spray solution

APPLICATION METHOD

Spray or inject into soil beneath and around buildings or in termite-infested areas.
*Dilution transcribed as printed in the supplied source; requires verification.
