INSECTICIDES

DABO

Active ingredient:

Cyflumetofen 20%

Product properties:

A non-systemic contact acaricide from the beta-ketonitrile group. Highly effective against mites on different crops. It inhibits mitochondrial electron transport in pest cells, stopping ATP production and causing paralysis and death. Controls eggs, larvae, nymphs and adults, with rapid action and prolonged protection. Particularly effective against red spider mites and relatively safe for natural enemies when used at recommended rates.

Application rates and method

Crop	Target pests	Application rate	PHI
Vegetables: tomato, pepper, eggplant, zucchini, pea, bean, cucumber, melon, watermelon	Mites	75-100 mL/100 L water	1 day
Fruit trees: apple, pear, grape, peach, nectarine, cherry, plum, fig	Mites	75-100 mL/100 L water	3 days
Citrus	Mites	75-100 mL/100 L water	3 days
Ornamental plants	Mites	75-100 mL/100 L water	-

Controls all mite stages
