وادي الصفوة الزراعية
WADI ALSAFOH

FERTILIZERS

DESALVALLE

COMPOSITION

Component	Content (w/v)
Calcium oxide (CaO)	14.7%
Organic acids	20.82%
Density	1.36

DESCRIPTION AND BENEFITS

• Liquid complexed calcium for treating calcium deficiency in plants and soil salinity, improving crop quality.
• Regular application restores organic fertility. Lignosulfonic acid loosens compacted soil and reduces nutrient loss.
• Treats calcium deficiency and improves the biological availability of nutrients for root uptake.

DESALVALLE – COMPLEXED CALCIUM

Country of origin: Spain

APPLICATION RATES

Crop / condition	Application rate
All plants in high-sodium soils	5-7 L/ha with irrigation water
Greenhouses	0.5-2 L/1,000 m² with irrigation water

COMPATIBILITY

Do not mix with sulfates or phosphates. Conduct a small mixing test before use.
