WADI ALSAFOH

PUBLIC HEALTH PESTICIDES

Fipro Solution

BENEFITS

- Strong, long-lasting activity.
- Effective against termites and crawling insects.
- Acts by contact and ingestion.
- Suitable for soil and building treatments.

ACTIVE INGREDIENT

Fipronil 5% SC

Chemical group: Phenylpyrazoles

DESCRIPTION

Suspension concentrate insecticide for termite control. Disrupts GABA receptors in the insect nervous system, causing excessive neural activity, paralysis and death. Provides high efficacy and long-lasting activity.

APPLICATION RATES

Target pest	Dilution rate	Application rate
Termites: pre-construction	5 mL product/L water	5 L spray solution/m²
Termites: post-construction	6 mL product/L water	1 L spray solution/m²

APPLICATION METHOD

Apply by spraying or injecting into soil before construction. After construction, spray infested areas.
