وادي الصفوة الزراعية
WADI ALSAFOH

FERTILIZERS

Fork

COMPOSITION

Component	Content (w/w)
Humic acid	41%
Fulvic acid	10.5%
Potassium (K_2O)	3%

DESCRIPTION AND BENEFITS

Granular potassium humate improves the physical, chemical and biological properties of soil, nutrient availability and productivity. Improves the utilization of added fertilizers and chelates nutrients for easier plant uptake.
The granular form provides gradual release, prolonging its effect and reducing the number of applications required during the season.

Fork

Country of origin: China

APPLICATION RATES

Crop	Application rate
Forage crops	Broadcast: 25-50 kg/ha
Open-field vegetables	Broadcast: 25-50 kg/ha
Fruit trees	Broadcast: 25-50 kg/ha
Greenhouses	Broadcast: 5 kg/1,000 m^2

COMPATIBILITY

Apply by broadcasting. May be mixed with other granular fertilizers immediately before application.
