FERTILIZERS

Focus Ca

COMPOSITION

Component	Content (w/v)
Calcium (CaO)	22%
Nitrogen (N)	12%
Organic acids (carboxylic acid)	22%
Density	1.36

DESCRIPTION AND BENEFITS

• High-purity liquid fertilizer rich in organically complexed calcium, improving uptake and calcium movement within plants.
• Treats calcium deficiency and prevents blossom-end rot and fruit cracking.
• Replaces sodium ions with calcium to reduce soil and water salinity and improve soil structure.
• Nitrate nitrogen supports calcium uptake, vegetative growth and crop quality.
• Organic acids improve cell membrane permeability and nutrient uptake.
• Improves soil fertility, reduces compaction and enhances aeration. Suitable for regular use with irrigation systems or foliar spraying.

FOCUS CA – SYSTEMIC ORGANO-COMPLEXED CALCIUM

Country of origin: Italy

APPLICATION RATES

Crop / condition	Application rate
Field crops	5-7 L/ha with irrigation water
Vegetable crops	5-7 L/ha with irrigation water
Fruit crops	5-7 L/ha with irrigation water
Greenhouses	0.5-2 L/1,000 m^2
Calcium deficiency treatment	3-4 L/ha with irrigation water

COMPATIBILITY

Do not mix with phosphorus, sulfur, urea or humic acid.
