INSECTICIDES

FRANK

Active ingredient:

Bifenazate 43%

Product properties:

A non-systemic contact acaricide. Rapidly controls adult mites and nymphs and prevents development of immature stages. Provides prolonged activity on treated leaves and limits reinfestation. Relatively safe for natural enemies and suitable for integrated pest management programmes.

Application rates and method

Crop	Target pests	Application rate	PHI
Vegetables: cucurbits, tomato, pepper, eggplant, okra	Mites of various species	25-30 mL/100 L water	3 days
Strawberry	Mites of various species	25-30 mL/100 L water	1 day
