Grow Peat

COMPOSITION

Component	Content
Organic matter (sphagnum moss)	96.5%
Moisture	45-55%
Particle size	0-10 mm
pH	3-4

DESCRIPTION AND BENEFITS

High-quality, fine peat moss soil conditioner, free of nematodes and weed seeds, derived from partially decomposed sphagnum moss. A natural organic growing medium that improves soil structure, water retention and aeration, and promotes healthy root growth.

GROW PEAT
PEAT MOSS

Country of origin: Estonia

USES

Use	Application
1	Horticulture, agriculture, landscaping and nurseries.
2	Greenhouse production as a soil conditioner and essential growing-medium component.
3	Seed germination and soil mixes.
4	Vegetable and ornamental plant cultivation.
5	Hydroponic growing-media mixes.

COMPATIBILITY

May be mixed with perlite, vermiculite and all fertilizers.
