وادي الصفوة الزراعية
WADI ALSAFOH

PUBLIC HEALTH PESTICIDES

IDAL

BENEFITS

- High efficacy with relatively extended activity.
- Reaches insects in hiding sites.
- Transfer within the colony helps reduce infestation.
- Easy direct application without preparation.

ACTIVE INGREDIENT

Imidacloprid 2.15% RB

Chemical group: Neonicotinoids

DESCRIPTION

Ready-to-use gel bait for cockroaches. Binds to acetylcholine receptors, disrupting nerve signals and causing paralysis and death. Highly effective when ingested by insects, making it suitable for cockroach baiting programs.

APPLICATION RATES

Target pest	Application rate
American and German cockroaches	0.1 g per spot; 4 spots/m²

APPLICATION METHOD

Apply the gel directly as small spots at pest activity and hiding sites.
