PUBLIC HEALTH PESTICIDES

PRO LOOK

BENEFITS

- Rapid knockdown of target insects.
- Highly effective against crawling and flying insects.
- Acts by contact and ingestion.
- Suitable for public health and household pest control.

ACTIVE INGREDIENT

Deltamethrin 2.5% WP

Chemical group: Pyrethroids

DESCRIPTION

Wettable powder insecticide for public health pests: cockroaches, houseflies, mosquitoes and bed bugs. Acts on sodium channels, disrupting nerve signals and causing excessive activity, paralysis and death.

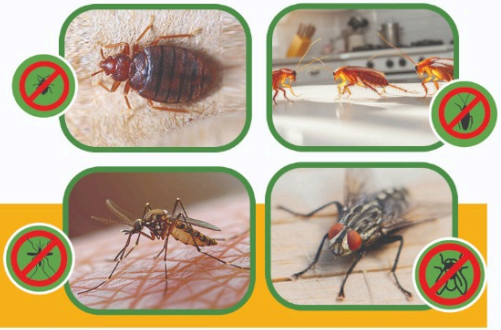

APPLICATION RATES

Target pest	Dilution rate	Application rate
Cockroaches, houseflies, mosquitoes and bed bugs	15-20 g product/L water	300 mL spray solution/10 m^2

APPLICATION METHOD

Dilute with water and spray surfaces or infested areas according to the registered product use.
