وادي الصفوة الزراعية
WADI ALSAFOH

PUBLIC HEALTH PESTICIDES

PRIYDE

BENEFITS

- Highly effective against crawling insects.
- Extended activity through transfer between insects.
- Ready-to-use bait requires no mixing or dilution.
- Effective by ingestion and contact.

ACTIVE INGREDIENT

Imidacloprid 2.5% RB

Chemical group: Neonicotinoids

DESCRIPTION

Ready-to-use gel bait for ants and cockroaches. Acts on nicotinic receptors in the insect nervous system, stopping feeding and causing death. Provides an indirect effect through spread within the colony.

APPLICATION RATES

Target pest	Application rate
Cockroaches and ants	0.1 g per spot; 5 spots/m^2

APPLICATION METHOD

Place bait in insect hiding sites.
