PUBLIC HEALTH PESTICIDES

Royal

BENEFITS

- Highly effective against the listed crawling and flying insects.
- Suitable for indoor public health programs.
- Easy to prepare by mixing with water and applying as a spray.

ACTIVE INGREDIENTS

Lambda-cyhalothrin 10% w/w
Silicon dioxide 19% w/w

DESCRIPTION

Public health insecticide for crawling and flying insects. Acts by contact and ingestion. For indoor use as part of approved pest control programs.

APPLICATION RATES

Target pest	Dilution rate	Application rate
Cockroaches, bed bugs, ants and mosquitoes	5 g product / 0.5 L water	500 mL spray solution/10 m²

APPLICATION METHOD

Spray insect activity and hiding sites, including corners, cracks and behind furniture. Follow safety precautions and avoid surfaces that contact food.
