وادي الصفوة الزراعية
WADI ALSAFOH

FERTILIZERS

Subway

COMPOSITION

Component	Content (w/w)
Humic acid	61%
Fulvic acid	10.5%
Potassium (K_2O)	11%

DESCRIPTION AND BENEFITS

ات.

زيئاته.

Granular potassium humate improves the physical, chemical and biological properties of soil, nutrient availability and productivity. Improves the utilization of added fertilizers and chelates nutrients for easier plant uptake.

• High humic acid content improves soil structure. Fulvic acid supports rapid nutrient movement within plants.

• Potassium supports fruit quality and stress resistance. Improves water retention and aeration, especially in sandy soils low in organic matter.

APPLICATION RATES

Crop	Application rate
Forage crops	Broadcast: 25-50 kg/ha
Open-field vegetables	Broadcast: 25-50 kg/ha
Fruit trees	Broadcast: 25-50 kg/ha
Greenhouses	Broadcast: 5 kg/1,000 m^2

COMPATIBILITY

Apply by broadcasting. May be mixed with other granular fertilizers immediately before application.
