FUNGICIDES

VELVET

Active ingredient:

Fosetyl-aluminium 80%

Product properties:

A systemic fungicide formulated as water-dispersible granules (WG) to control fungal diseases in several crops. Moves both upwards and downwards within the plant, helping control stem and root rot.

Application rates and method

Crop	Target diseases	Application method	Application rate	PHI
Cucumber, cucurbits	Downy mildew	Foliar spray	3 kg/1000 L water	7 days
Onion	Downy mildew	Foliar spray	2.5 kg/1000 L water	14 days
